

ROTECH Consulting Inc. Customer Honored at the 2011 Constructech Vision Awards

ROTECH and Meridian Systems receive Enabler Awards for service excellence

SAN DIEGO, Calif. (September 27, 2011) – ROTECH Consulting, Inc., a leading California construction technology firm and a Meridian Systems Value Added Reseller (VAR) with offices in San Diego and San Francisco, announced today that Constructech Magazine has honored ROTECH customer South Bay Union School District with a Gold 2011 Constructech Vision Award. ROTECH and Meridian Systems received Technology Enabler Awards.

The Constructech Vision Awards honor companies that have realized the advantages of applying innovative technologies to their everyday businesses as well as the technology enablers that have helped them achieve their goal.

Eligible companies were involved in residential, commercial, and heavy construction, and also included professionals in all trades, architectural and engineering firms, corporate owners, facility management companies, government agencies, education, and land developers.

“The implementation of software technology to the South Bay Union School District bond program has provided a structured approach to managing the abundant amount of data. This has led to greater clarity and accuracy throughout the program,” said Garet McInroe, ROTECH Consultant on the program. “The database of information is easy to access and is straightforward for retrieving requested information. The user forms to enter information are intuitive and restrict incorrect data entry which in turn makes managing the program much less time consuming. Reports are modified to suit the client’s needs making presentations, meetings and reconciliations a success. Overall the addition of the technology has improved efficiency, reduced risk and increased profitability.”

“The Vision Awards certainly give us insight into some of the most cutting-edge implementations taking place in the construction industry,” says Mike Carrozzo, chief editor, *Constructech* magazine. “We continually have the chance to recognize innovation in so many sectors of the industry—homebuilding, specialty, heavy/highway, healthcare, education, to name a few. I hope we continue to see this caliber of innovation flooding every corner of the marketplace.”

ROTECH Consulting, Inc. headquartered in San Diego, CA is a construction technology firm that specializes in project management and scheduling solutions. ROTECH helps owners, design teams and contractors implement best of breed solutions that improve efficiency, reduce risk and increase profitability. Clients include large multiple-billion dollar organizations, general contractors, universities and small local contractors.
