

ROTECH Expanding to Serve Northern California and Nevada Markets

Increased demand for construction project management software and services drives ROTECH to increase footprint and personnel

SAN DIEGO, Calif. (July 25, 2011) – ROTECH Consulting, Inc. (ROTECH), a construction technology firm that specializes in project management and scheduling solutions and a Meridian Systems Value Added Reseller (VAR), announced today it will be opening an office in San Jose. The office will provide sales support and consulting services for the Northern California and Nevada market.

“We’ve been fortunate to draw increasing interest around the Western United States,” said Don Rote, ROTECH founder and president. “This will be the first of several expansions that we’re planning to help us meet the demand for world-class construction services outside Southern and Central California.”

Rochelle Antis, ROTECH’s director of business development is a new addition to the expanding ROTECH team and assigned to manage the companies increased demand for services, will be instrumental in bringing the new office on-line. Antis joined ROTECH in 2010 and has contributed significantly to the recent growth. Additionally, ROTECH has also increased the team to include Paul Hardy, Application Consultant and Trainer, and Lily Kernan, Business Manager for the corporate office to further address the need for resources needed to service this growing opportunity.

“The opportunity to expand our territory and add staff in Northern California and Nevada is a reflection of a recovering economy. Additionally, the products from Meridian Systems continue to be well received by both local markets and we are experiencing increased demand for both software and related services. By expanding our geographical footprint and personnel, ROTECH will be well positioned to better serve both existing and new customers,” said Antis.

Prolog software delivers total project management control for construction projects by automating day-to-day tasks and processes, from project design to close-out. For more information on Prolog software, call Meridian at (800) 850 2660, or visit:
